Case Study Summary

Enterprise Appeals Transformation and Workforce Enablement

EXECUTIVE SUMMARY

Supported a large-scale workforce transformation initiative for **Centene's Medicare Appeals** organization by designing and delivering a blended learning solution that prepared multiple business units for an **end-to-end appeals process transformation**.

Collaborated across project management, learning experience, client-facing, and operational teams to develop scalable learning resources supporting multiple insurance plans, user roles, and regulated business processes.

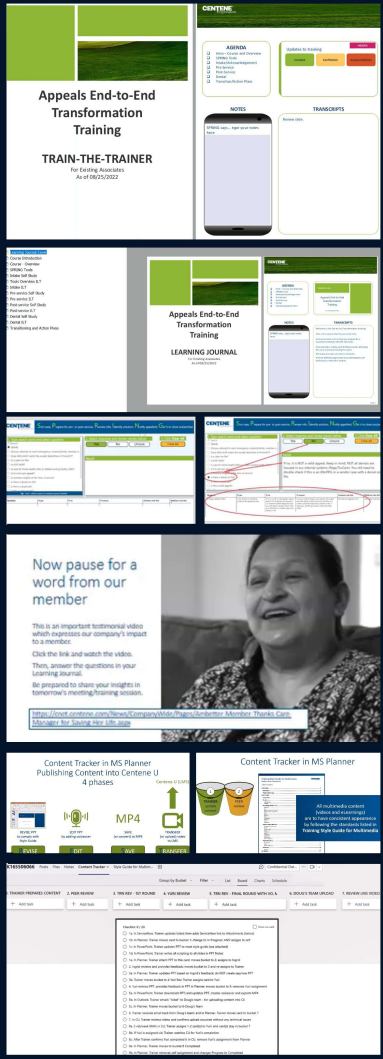

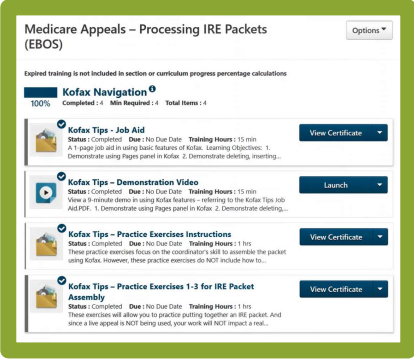

The initiative combined instructor-led training, self-paced learning, performance support tools, and manager resources to improve workforce readiness while supporting the organization's phased **SPRING** launch strategy.

SEER: A Visionary Approach to Workforce Transformation

3 minute video snapshot. Throughout my career, I've combined visionary thinking with practical execution to help organizations prepare for the future. By anticipating workforce needs, leveraging emerging technologies, and designing scalable learning ecosystems, I align workforce development with business strategy.

This philosophy inspired me to create the **SEER Framework**... a business-focused methodology built on **Strategy, Execution, Enablement, and Results**. SEER transforms business objectives into workforce capability, equips employees with the knowledge and support to succeed, and measures business impact.

SEER PHASE	DETAILS	SAMPLE or THUMBNAIL
STRATEGIC	Decide plans by defining the future. The learning strategy aligned workforce preparation with the organization's SPRING implementation and supported an enterprise-wide transformation of Medicare Appeals processing. Training was designed to address multiple insurance plans, varied operational roles, and regulated business requirements while supporting business timelines through cross-functional collaboration. Strategic Activities • Business alignment • Cross-functional stakeholder collaboration • Learning strategy • SPRING implementation support • Transformation strategy • Workforce planning for multiple learner audiences	
EXECUTION	Design workforce using tactics. (Knowledge, Skills, Attitude, Behavior) The learning solution defined the knowledge, skills, and behaviors required for multiple operational roles involved in Medicare Appeals processing. Training architecture supported different insurance plans, plan types, and job responsibilities while providing facilitator guidance and structured learner experiences. Execution Activities • Learning architecture • Role-based learning design • Knowledge architecture • Facilitator-led learning design • Blended learning design • Capability development	

SEER PHASE	DETAILS	SAMPLE or THUMBNAIL
ENABLEMENT	Develop resources to prepare people for success. (Deliverables, resources and tools) Developed learning resources and performance support tools that enabled employees and managers to successfully adopt new processes while reducing dependency on multiple reference documents. Deliverables - Action Plan - Animations - Ask SPRING BOT workflow - Ask SPRING FAQ platform - Downloadable consolidated resource packet - Facilitator guide with screenshots - Instructor-led training - Learning Journal - Manager demonstrations - Performance support resources - Self-paced learning modules - Technical training to assemble PDF pages - Train-the-Trainer Guide\ <i>Designed training for appeal agents processing IRE packets that were submitted to Maximus AND then published in Cornerstone.</i> 	 
RESULTS	Evaluate data to measure business impact. The learning solution was fully designed and prepared for deployment; however, organizational leadership changed before implementation occurred. As a result, the initiative was cancelled prior to launch, preventing measurement of learner adoption and business performance.
