Executive Portfolio –
Case Study Summary

Enterprise Certification Transformation & Data-Driven Learning Optimization

EXECUTIVE SUMMARY

Led enterprise learning initiatives that modernized Humana's annual certification and recertification programs supporting more than **90,000 agents**.

Combined instructional design, learning strategy, content optimization, user experience improvements, data analysis, and cross-functional collaboration to improve learner outcomes while maintaining regulatory compliance and meeting critical business timelines.

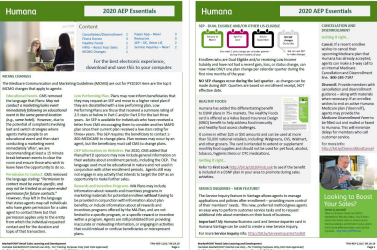

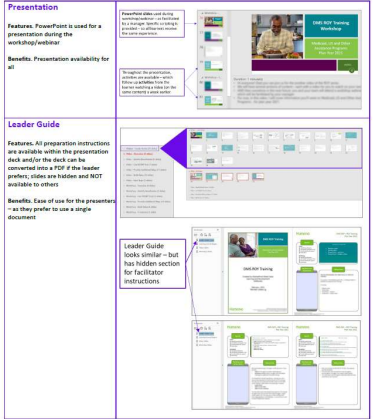

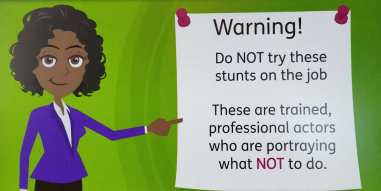

Beyond redesigning large-scale certification content, developed innovative data analysis solutions that transformed thousands of learner feedback comments into actionable insights, enabling the organization to make more informed decisions about future learning improvements. These initiatives demonstrate leadership in learning transformation, continuous improvement, and data-driven workforce development.

SEER FRAMEWORK

3 minute video snapshot. Throughout my career, I've combined visionary thinking with practical execution to help organizations prepare for the future. By anticipating workforce needs, leveraging emerging technologies, and designing scalable learning ecosystems, I align workforce development with business strategy.

This philosophy inspired me to create the **SEER Framework**—a business-focused methodology built on **Strategy, Execution, Enablement, and Results**. SEER transforms business objectives into workforce capability, equips employees with the knowledge and support to succeed, and measures business impact.

SEER PHASE	DETAILS	SAMPLE or THUMBNAIL
STRATEGIC	Decide plans by defining the future. Developed learning strategies focused on improving learner outcomes, increasing certification effectiveness, simplifying compliance education, and creating data-informed continuous improvement processes. Strategic Activities • Accessibility strategy • Certification strategy • Compliance learning strategy • Content strategy • Data-informed continuous improvement • Evaluation and measurement strategy • Learner experience strategy • Learning strategy • Workforce development strategy	
EXECUTION	Design workforce using tactics. (Knowledge, Skills, Attitude, Behavior) Designed certification experiences that strengthened workforce capability by improving access to essential knowledge while reducing unnecessary complexity. Knowledge • Business policies • Certification requirements • Compliance requirements • Operational procedures Skills • Application of recertification • Continuous learning	

	- Decision making - Information navigation Attitudes - Accountability - Accuracy Behaviors - Compliance - Continuous improvement - Knowledge application - Quality performance Execution Activities - Content optimization - Data analysis - Information architecture - Instructional design - Learner feedback analysis - Learning evaluation - User acceptance testing - User experience design	
ENABLEMENT	Develop resources to prepare people for success. (Deliverables, resources and tools) Developed learning resources and business tools that improved learner access to recertification content while supporting large-scale review processes and continuous improvement through learner analytics. Deliverables, Resources & Tools - Accessibility improvements - All-in-One presentation, leader guide, and learning journal - Automated sentiment classification tool - Certification guidance - Content review resources - Feedback categorization - Learner feedback analysis spreadsheet - Recertification guidance - Reviewer recruitment process - Train-the-Trainer support - User Acceptance Testing (UAT) plan - Web-based learner resources - Workday-supported review process Must See! Podcast describing Humana’s recert project 	   - Spoke at Association for Talent Development (ATD) on creating and implementing accessibility standards - Addressed accessibility challenges within a large organization of approximately 90,000 associates - Developed audio and visual accessibility standards when ADA and WCAG “guidelines” did not fully apply to blended learning - Led a cross-functional team to design practical audio and visual accessibility standards - Improved inclusivity and overall learner experience... With survey feedback showing strong preference for flexible learning options... as the standards were well received not only by learners with accessibility needs, but also by able-bodied learners who valued the added flexibility  
RESULTS	Evaluate data to measure business impact. The initiatives improved learner experience by significantly simplifying certification guidance while maintaining compliance requirements and supporting successful annual launches for more than 90,000 agents. Certification content was reduced from 96 pages to 26 pages, improving clarity and usability without compromising regulatory requirements. A redesigned web-based guidance experience enhanced navigation and learner accessibility while meeting project timelines despite changing business requirements. The data analysis solution transformed the review of approximately 38,000 learner feedback comments by automating sentiment identification and categorizing responses into 18 feedback themes, replacing manual	

	tallying methods and improving the organization's ability to identify trends and prioritize learning improvements. The comprehensive User Acceptance Testing process, supported through innovative use of Workday data, became an internal Human Resources case study for future reviewer recruitment practices.
